Gameplay

In *Scooby-Doo! Phantom of the Knight*, players guide the Mystery Inc. gang through a medieval castle to uncover clues and solve puzzles that lead to the culprit. The adventure unfolds by collecting items and using them in specific locations. Progress depends not only on finding clues but also on completing mini-games. Success in these games earns Scooby snacks, which are required to persuade Scooby into exploring spooky areas. Difficulty levels adjust the number of snacks needed and the complexity of puzzles, with each level introducing a different villain and new clues. Gameplay is controlled entirely with the mouse, and when clues are gathered efficiently, the adventure lasts about as long as a cartoon episode.[2]

Reception

All Game Guide said "It's very effective for the targeted age group and is just difficult enough to keep interest high".[2]

Games Domain said "Despite these small reservations, we loved this game, and I would recommend it for children in the mid range of 6-9 years of age".[4]

According to *PC Data*, the game sold 81,154 copies.[5]
